1. The following is an examiner's statement of reasons for allowance: Applicants show a lubricated tablet comprised of acetylsalicylic acid wherein the lubricant is contained only on the surface of said tablet. Applicants further show a method of producing a tablet comprised of an active substance adversely affected by a lubricant. The prior art shows lubricated tablets wherein the lubricant is limited to the tablet surface. Leal et al US 3,042,531, considered the closest prior art of record, shows a tablet comprised of ascorbic acid having a lubricant coating. The prior art does not show nor fairly suggest applicants' tablet comprised of acetylsalicylic acid having a surface coating of a lubricant. Nor does the prior art show or suggest a method for producing said acetylsalicylic acid tablet comprised of an active substance that is affected by a lubricant wherein the lubricant in powder form is dispersed by spraying within positive pulsating vibration air on a lower surface of an upper punch, an upper surface of a lower punch and an inner circumferential wall of a die in a tableting machine. The method wherein the admixture of adjuvant and active agent does not contain lubricant provides a means for stabilizing said active agent.

2. Claims 1, 5, 6, 10 and 14-16 are allowed.

3. Claims 2-4, 7-9 and 11-13 have been canceled.

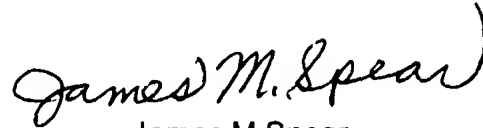

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
